This is in response to Papers filed on 05 May 2004.

I. The following is an examiner's statement of reasons for allowance:

The instant claims are now included the a bleaching step by using the made bleach composition on a conventional exposed and color developed silver halide color photographic material to oxidize silver ions (making-using or using-by-making process).

Kuykendall et al (6,534,253 on the record) disclose, teach and suggest a combined bleaching (oxidize silver ions in a bleaching solution, not citing in the claim, but well known and conventional in the art) and fixing (silver halide solvent (dissolve silver halide)) or combined blixing composition.

The bleaching step alone on a conventional exposed and color developed silver halide color photographic material in the instant claims to only oxidize the exposed silver ions that is distinct from the combined bleaching and fixing composition and step in Kuykendall et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. Vincent et al (6,582,893 and 2004/0185390) have about the same teachings and suggestions as those in Kuykendall et al on the record.
